

■ Optimum maintenance services for landing gear, hydraulics and braking systems

▣ Landing gear

HYDREP experts provide the best possible support for clients, thanks to their ability to carry out maintenance services in dedicated workshops and on-wing. **HYDREP** also provides leased or standard exchange landing gear and systematically supplies its clients with Log Cards that indicate remaining service life of major parts.

▣ Wheels and brakes

Equipped to maintain parts from all aircraft manufacturers, **HYDREP** supports its customers over the long-term with Power By the Hour contracts and logistical support services. Its specialized workshop allows it to provide rapid, flexible and cost-effective services.

▣ Hydraulic systems

HYDREP maintains the full range of hydraulic systems, including servo controls, flap-screw, actuators, landing gear door latching devices and accumulators. More than 6,000 units, representing 1,250 distinct parts, are repaired or overhauled annually in **HYDREP** workshops.
